

# 2020 BARKLY

## Health Profile

### POPULATION

6,091

-7%

decrease between  
2011-2019

### AGE

### REMOTENESS

Barkly is classified as Very Remote Australia

Number of births	198
Youth Mortality Rate (age 15-24)	152.2 per 100,000
Median age at death (all persons)	58 years
Median age at death (Aboriginal persons)	56.5 years

### SOCIODEMOGRAPHICS

### ABORIGINAL AND TORRES STRAIT ISLANDER HEALTH

Aboriginal and Torres Strait Islander peoples are a significant and respected proportion of the NT population.

This is the oldest living culture in the world, and the connections to country, language and culture are a source of strength in modern Aboriginal communities. This population also tends to experience very high levels of disadvantage, particularly in more remote locations. This is reflected in poor health statistics, including high rates of chronic disease, infectious disease and premature mortality.

The estimated gap in life expectancy between Aboriginal and non-Aboriginal Australians in the NT is 14.4 years.

### IMMUNISATION

Proportion of children fully immunised (%)

1 year old

2 years old

5 years old

### LEADING CAUSES OF DEATH

1

Coronary heart disease

2

Diabetes

3

Land transport accidents

4

Assault

5

Malignant cancers of the lip, oral cavity and pharynx

### CANCER SCREENING

Proportion of eligible population screened (%)

16%

National Bowel Cancer Screening Program

32%

BreastScreen Australia

45%

National Cervical Screening Program
