VALUE OF THE COURSES

Chronic Disease Care Planning

Understand the benefit and development of patient care plans for chronic disease, health interventions that identify risk factors and supporting behaviour changes from team care to interventions that deliver improved health outcomes.

Chronic Conditions of the Foot

Building a practical skill set for foot assessment that enables a healthcare practitioner to be competent and confident in chronic conditions of the foot basic care.

Chronic Conditions and Nutrition

Develop an understanding of the key principles of nutrition and associated chronic conditions and create an overall understanding of how a healthy diet can support patient care.
